Open your sustainable future with JASE-World.

Japanese Business Alliance for Smart Energy Worldwide
Putting Japanese Technology to Work for Optimum Energy Solutions

Applying the Synergy of Japan’s Private and Public Sectors to Create Solutions

Corporations with expertise in
- Manufacturing
- Materials
- Power Generation
- Finance
- Engineering
- Consulting
- Renewable Energy
  and more

Leading Japanese trade associations in the fields of
- Heat Pumps and Thermal Storage
- Energy Services
- Energy Conservation
- Photovoltaic Energy
- Engineering
- Machinery
- Electronics and IT
  and more

Public sector entities
- Government Agencies
- Trade Organizations
- Institutes
- International Banks
- Municipalities
- International Cooperation Agency
  and more

Solutions

Projects for Greener Energy Production,
Higher Energy Efficiency and Renewable Energy Systems

The Japanese Business Alliance for Smart Energy Worldwide, commonly known as JASE-World, was founded in 2008 to promote advanced energy initiatives and implement them in partnership with governments around the world. One of its major goals is to contribute to solving global-scale issues such as climate change, energy security and so on.

Composed of Japan’s largest and best-known industrial corporations as well as distinguished industrial associations, JASE-World focuses the vast resources and capabilities of these organizations to provide innovative ideas and effective ways to carry them out. The goal is to give partner countries the best possible energy solutions — higher energy production that is environmentally friendly, low cost and sustainable.

JASE-World already has an impressive history of successful partnerships, and is presently engaged in a wide variety of projects in many countries. For all types of energy solutions, from homes, offices and communities to factories and infrastructure, JASE-World is ready to help you achieve your energy goals.
Working Areas

**Energy Saving Solutions**

**Publicity Activities**

**Renewable Energy**

**Waste to Energy**

**Geothermal**

Working Groups are set up composed of the Japanese entities with expertise in that particular area, who work with the relevant organizations in the partner country to successfully complete the project.

**Japanese Smart Energy Products & Technologies**

A compilation of smart energy products and technologies available from JASE-World members. These are classified into nine categories: Factory, Industries, Office building, Residence, Construction/transportation & Logistics, Power Generation & Distribution, Renewable Energy, Energy Solutions, and Smart community.

Japanese Smart Energy Products & Technologies is available in English, Chinese, Spanish, Portuguese, Russian and Vietnamese.
